RESPONSIBILITY

Social Compliance “BSCI”

As members of the ‘BSCI/Business Social Compliance Initiative’ we commit ourselves to implementing the BSCI code of conduct as part of our business relations with our manufacturers and thus to improving the working conditions within our supply chain and to producing our textiles fairly. This includes our clear commitment to the employees’ right to freedom of assembly, protection against discrimination, and an adequate remuneration, that is, at least the statutory national minimum wage. Another central component is the occupational safety regulations. That is how we guarantee that employees do not work more than 48 hours a week and that the occupational safety regulations of the ILO (International Labour Organisation) are met. Child labour, forced labour or precarious jobs are not tolerated.

A 7-member Social Compliance Department in Shanghai and Dhaka tests all the factories thoroughly and makes sure that these conditions are met.

<http://www.bsci-intl.org/>

Oeko-Tex® Standard 100

This standard guarantees that textile and non-textile product components pose no threat to health.

www.oeko-tex.com

Adherence to the REACH-Regulations

We assure you that when manufacturing our **myrtle beach** caps and **JAMES & NICHOLSON** textiles we meet the obligations of the REACH-Regulations.

Protection of the Environment

All the manufacturing plants of our **myrtle beach** caps and **JAMES & NICHOLSON** textiles work on the highest environmental level and pursue the principle of sustainability. For example, all the manufacturing plants dispose of a water purification plant.

Quality Standard

The merchandise is regularly tested by certified testing institutes in Quakenbrück and Bangladesh regarding the confirmed parameter. Moreover, in cooperation with SGS, Testex, Hohenstein and other renowned institutes the quality is continually controlled.

FUNCTIONS

Breathability / Permeability to vapour

Functional textiles must have the ability to transport moisture from the skin to the fabric surface as fast as possible. Permeability shows how much steam in grams can evaporate on a surface of 1 m² within 24 hours. The higher this figure, the more breathable the textile is.

Water column

The ability to withstand water pressure without moisture penetrating into the material is given by the water column (mm). The minimum standard is a water column of 1,500 mm.

Taped seams

To avoid moisture penetrating into the fabric, seams can get taped. Taped seams are 100 % water-proof.

CORDURA®

CORDURA® is a very sturdy, textured polyamide fabric, which is extremely tear- and abrasion-proof. Special yarns, specially developed weaving techniques, dyeing methods and additional textile finishing ensure that products with CORDURA® can be used as durable and comfortable workwear.

DuPont™ Sorona®

Sorona® renewably sourced fiber delivers superior performance benefits to today's fashions. Fabrics that use Sorona® are very soft, very strong and dry quickly. Sorona® helps fabrics stretch comfortably and retain their shape. And, it is made with plant-based ingredients. DuPont™ Sorona®. Designed for Performance. Derived from Nature.

Thinsulate™ INSULATION

The light-weight thermal insulation affords optimum protection against cold despite its minimum thickness. It even keeps you warm in damp or wet conditions. Thinsulate™ INSULATION offers excellent comfort and allows optimum room to move. It is extremely breathable, durable and easy-care.

Softshell

Softshell with TPU membrane consists of three layers. Due to the microporous TPU membrane as middle layer the material is water-proof, wind-proof and breathable at the same time.
